Water Resistant

Built-in Battery

Function Buttons

Basic Operations

Step 1: Insert a microSD memory card.

(Note: Always format new memory cards before using them for the first time.)

Step 2: Recording Videos

To start recording, press and hold the  button for 1 second; you will hear 1 beep. The red LED light will flash during recording.

To stop recording, press and hold the  button again for 1 second; you will hear 2 beeps. The red LED light will then turn off.

Feature 1 - 360° Rotating Clip

- Rotating shoulder clip wearable to a uniform or jacket.

360° rotatable clip

360° rotatable clip attached for easy operation

360° Rotation

Feature 2 - Heavy Duty Casing

- **IPX4*** water resistant
- Rugged, **shock resistant** (meets U.S. military drop-test standards)

MIL-STD-810G 516.6-Transit Drop Test

*IPX4: Water splashing against the enclosure from any direction shall have no harmful effect.

Feature 3 - Auto Infrared Light

- **Infrared LED light** to have better night vision on the video.
- Ideal for night-shift police officers, security guards, or anyone who needs video recording at nighttime or in dark conditions.

Four IR LED Lights

Note: When in low light conditions, infrared light will be automatically turned on, and videos are captured in grayscale with a high-contrast look.

Feature 3 - Auto Infrared Light (cont.)

- Recorded image in low light conditions.

Feature 4 - Snapshot

- Convenient **snapshot** button to take photos (.jpg) while recording.

Note: Photos taken with Infrared LED will be in grayscale.

Feature 5 - Built-in Battery

- Built-in battery with greater capacity to ensure uninterrupted recording for **3.5 hours**.

Note: The orange LED light will flash to indicate a low battery level.

Feature 6 - Free 32GB Bundle Card

- Bundles with a 32GB MLC SD card (TS32GUSDHC10U1)

FREE!

Big capacity 32GB

Class 10

MLC Flash

Better reliability than TLC cards in the market

- One video file is saved for every **3** minutes of recording.
- A 32GB card can store around **4 hours** of **Full HD** footage.
- There is no “loop recording”. When the memory is almost full, the blue LED light will flash to remind the user.

Feature 7 - Exclusive Software

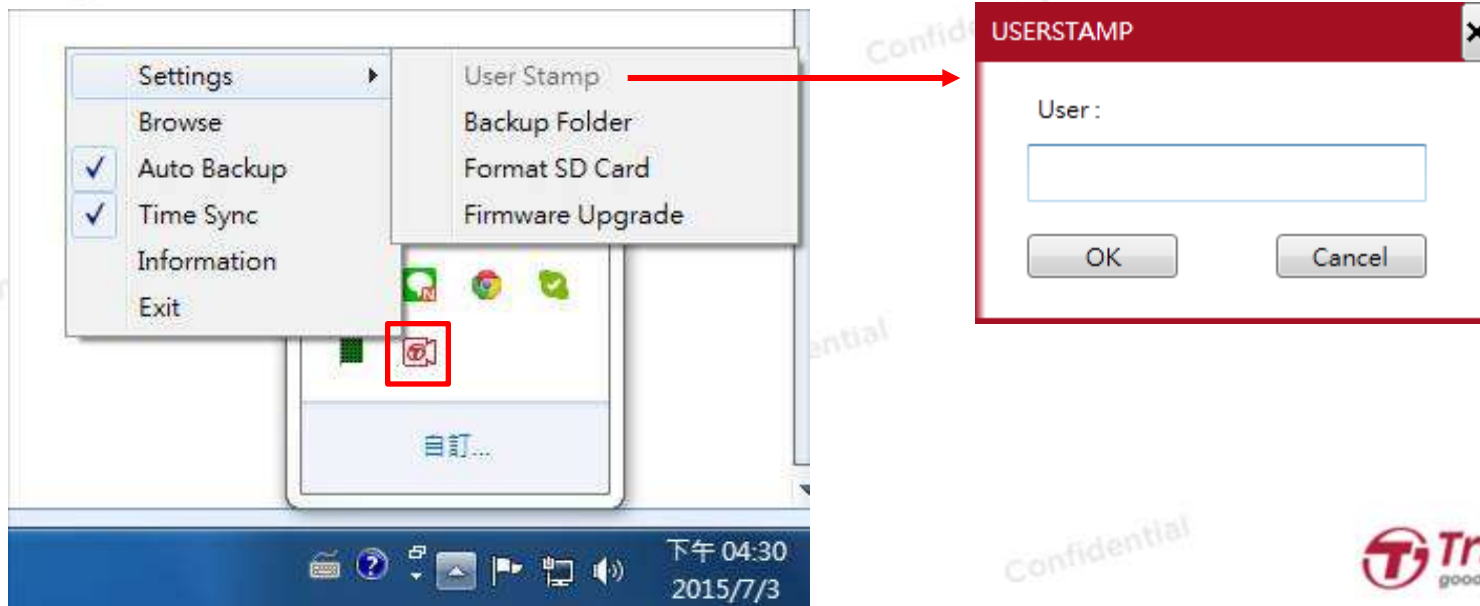

- DrivePro Body Toolbox™ software allows Windows users to set the basic functions of the DrivePro Body 10.

- Set the **user stamp**

- Auto backup setting

Select to automatically backup all the video files and photos every time the DrivePro Body 10 is connected to the computer.

- Firmware upgrade

Example of Recorded Video

- An ultra clear view from the Full HD video recording.
