AL5-3DET Bug Detector

Is lack of privacy bugging you?

Peace of mind is now within your reach. The Bug Detector offers state of the art protection against wireless microphones and transmitters. Perfect for securing homes, offices and hotel rooms, the unit not only detects such devices, its LED display and audio tone actually pinpoint the precise location of bugs. The audio alarm can be turned off for discreet sweeps, while the unit's sensitivity adjustment minimizes false alarms.

The Bug Detector™ features wide range circuitry that enables it to detect concealed transmitters operating on frequencies from 50 MHz to 3 GHz, exposing most high frequency transmitters as well as more common VHF and UHF bugs. You didn't know they were listening...until now.

FEATURES

- Adjustable Sensitivity Tuner
- Detects Frequencies From 50 MHz To 3 GHz
- Multi-Channel Scanning
- Audible/LED Alarm
- Pinpoints Exact Location Of Bugs
