MemoCam™ Series

COVERT CAMERA + PIR DETECTOR + SMART VCR ALL IN ONE STAND-ALONE DEVICE

The **MemoCam™** is a complete stand-alone CCTV system in one device. It includes a CCD camera, a video compression engine, a Memory Card module, a PIR detector and serial communication capabilities (optional).

When used as a stand-alone unit, it automatically records events on the memory card following an alarm. The alarm can be activated by an external open contact or by the internal PIR detector.

To analyze the recorded events, the memory card can be removed from the **MemoCam™** unit and inserted in a Memory Card Reader connected to a PC.

A Remote Control unit enables you to activate/deactivate the Automatic Event Recording process or to record an event manually.

MAIN FEATURES

- Stand-alone integrated CCTV system packaged in a standard PIR detector case.
- B/W camera (color optional).
- Records up to 6,000 images in a single memory card.
- Automatic recording upon alarm.
- Pre and post alarm recording.
- Automatic setup by memory card.
- Covert case.
- View and playback of recorded video images.
- Download of recorded events to the PC.
- Remote Control unit.

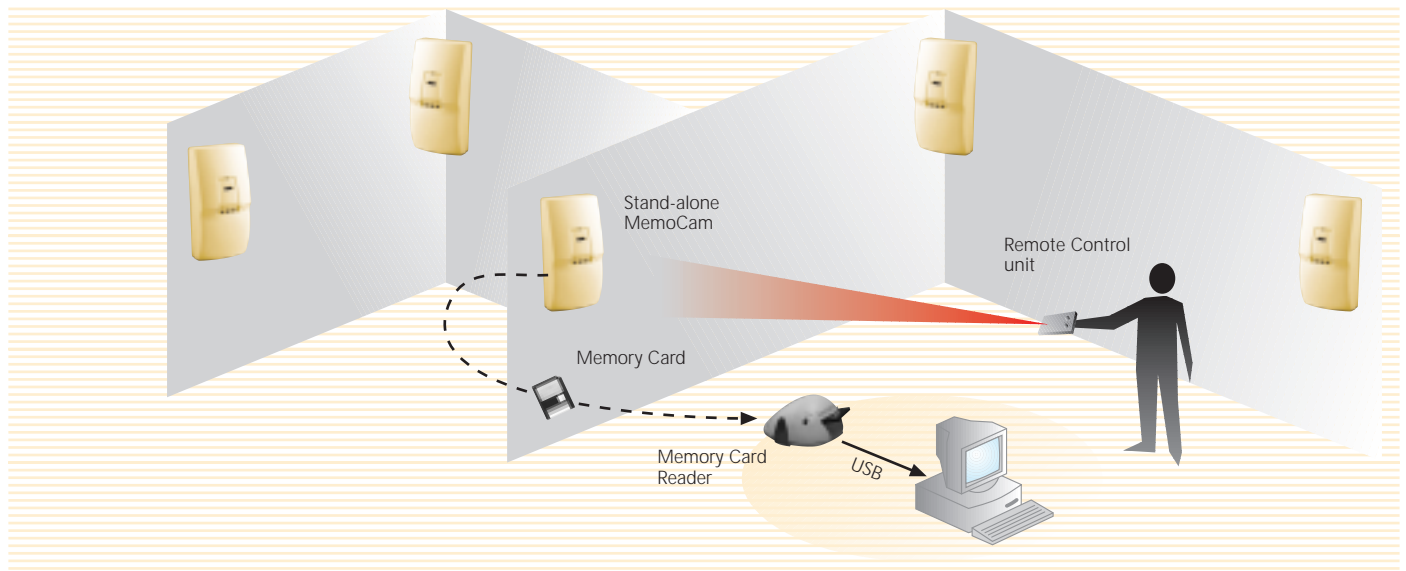

BENEFITS

- The stand-alone MemoCam replaces the classic [Time Lapse VCR + PIR Detector + Camera] equipment set.
- Modular CCTV solution from single camera to multiple site/multiple camera systems.
- Economic system expansion.
- No video cables required.

APPLICATIONS

- Recording of images and events where wire connections are impossible or difficult.
- "Nanny control" - Unattended automatic recording at any site.
- Modular digital CCTV systems in places where the required number of attached cameras might increase beyond initial plans.
- Mobile applications.
